Frontend developer with 15 years of boutique agency experience and a passion for cultivating collaboration in cross-functional teams

Experience

Type/Code
August 2022 - July 2025

Senior Frontend Developer

- Translated high-fidelity Figma mockups into mobile-first responsive websites using HTML, CSS/SCSS, and JavaScript/TypeScript
- Created frontend web applications built on top of a headless CMS using React, TypeScript, Next.js, Storybook, and data from REST APIs
- Built out data modeling in Statamic with a custom frontend utilizing Antlers (Statamic's custom templating language)
- Added new features to and maintain legacy projects built in Vue and Nuxt, with data coming from GraphQL requests
- Implemented minor backend changes across projects using Wagtail, Django, and Python

Civis Analytics
August - December 2021

Frontend Engineering Manager

- Crafted a hiring process specifically geared towards frontend engineers
- Conducted cross functional workshops with Product, Design, and Engineering stakeholders to assess frontend needs across different teams
- Created a roadmap for implementing a proprietary component library system leveraging Material UI

Thesis
September 2020 - July 2021

Engineering Team Lead, Infra & Availability

- Led a 7-person engineering team (frontend, software, backend, data, machine learning) working in a microservices based cloud computing environment in development of new projects and maintenance/improvement of existing products
- Took a product from working demo to sellable line items in addition to building up a support team for new product offerings
- Mentored team members taking on new roles by guiding time management, team management, cross-functional communication, deadline setting, roadmap creation, and boundary setting.
- Partnered with product owners and executive stakeholders to define product roadmaps, prioritize new features and enhancements, and balance timelines across interdependent products.
- Translated technical concepts and limitations for non-technical executives (e.g., CEO, COO) to support informed decision-making.

Thesis
October 2019 - August 2020

Senior Frontend Engineer

- Coordinated with Head of Product Engineering on team member and resource allocation based on skills and desired areas of growth
- Frontend development work including UI/UX development for internal portal utilizing Vue.JS, Typescript, Cloudflare's KV workers and wrangler, and AWS S3 with console.

Thesis
January - September 2019

Lead Frontend Developer - Marketing
- Responsible for high-level architecture/implementation decisions and roadmapping large-scale client implementations and internal product initiatives
- Supervised day-to-day operations for client facing frontend development team, including training of new hires, implementing initiatives for team technical growth, and implementing changes to workflow to maximize efficiency
- Managed technical project workflows, including scoping, planning, prioritization, cross-team coordination, and leading weekly retrospectives and planning meetings with internal and external stakeholders.
- Individual contributor building client branded web applications utilizing Ruby on Rails, Vue.js, jQuery, SASS, and custom javascript integrations of third party tracking / analytics

Pefin, Inc.
January 2015 - November 2018

Frontend Web Developer
- Balanced quick turn around times on post-sprint changes and bug fixes from previous sprint while meeting current sprint deadlines
- Conferred with Javascript developers on delivery dates for project handoff of completed HTML5/CSS3 files
- Initiated test run of prospective new project management systems (Jira & Taiga) to replace Asana
- Assigned projects and deadlines for off-site intern based on what can be worked on remotely, as well as project reviews

Open Hospitality / Pegasus
January 2010 - December 2014

Frontend Web Developer
- Advised customer support team and design team on feasibility to support unique client requests and expected turnaround time
- Collaborated with the design team members to enhance usability of designs by educating on best practices, up and coming trends and technologies in web development
- Lead developer for multi-property hotel branded websites, responsible for maintaining brand consistency throughout updates/redesigns

Yodle
February 2008 - January 2010

Web Team Workflow Coordinator / Global Template Designer & Developer
- Design and develop re-usable cross-browser compliant HTML/CSS templates on Yodle's custom CMS platform
- Workflow coordinator for a nationally distributed team of frontend developers
- Led training sessions to improve internal communication between web development and client support teams
